

12 WAY™ PERFORMANCE MIX

12WAY is a deep rooting hardy mix for tough environments

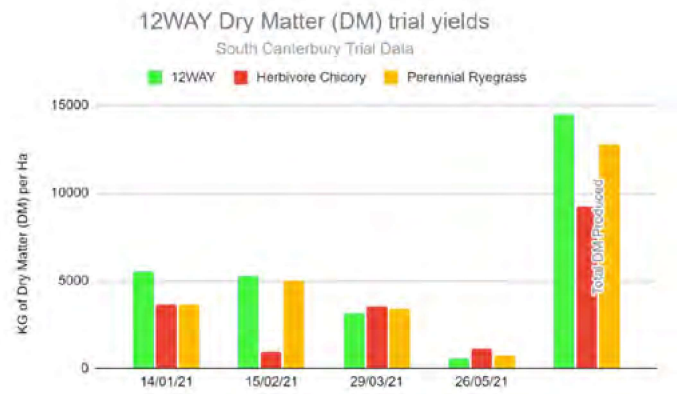

A summer safe, persistent mix containing no ryegrass. 12 WAY is fast to establish with good springtime Dry Matter (DM) production. 12WAY is a great mix for those looking to reduce synthetic Nitrogen input and increase sub-soil microbial activity. With high digestibility and a strong legume base this mix contributes to both soil and animal health while performing well under dryland conditions and good levels of protein our mix ensures good feed for stock in even the toughest of conditions. 12WAY has a very low grass staggers index and produces balanced intake levels of Metabolisable Energy (ME), protein and fiber with a good ratio of NDF to ADF.

Reduces soil compaction by up to 25%
Sowing Rate: **33kg per Ha**
Perenniality - HYBRID

Type: 

Rainfall:  **500-800**
Rainfall (mm)

BENEFITS:

- Fast establishing
- High protein structures
- Bulk springtime dry matter (DM)
- Strong legume content
- Persistent under dryland conditions
- Does not include ryegrass

| Autumn Test | 12 WAY | Perennial Ryegrass Mix |
|---------------|--------|------------------------|
| Ash % | 13.1 | 13 |
| Protein % | 17.3 | 16.2 |
| NDF % | 38.6 | 38.2 |
| Lignin % | 7.5 | 1.9 |
| In vivo DOMD% | 64.8 | 67.9 |
| ME Mj/Kg (DM) | 10.4 | 10.2 |
