

SOILBUILDER™

Quality feed with a focus on soil health

Suitable as a stand alone annual crop or for annual undersowing, Soil Builder mix is focused on revitalizing the soil without using large quantities of synthetic fertilizers. This mix allows the soil to breathe and aerate as well as increasing organic matter and nitrogen levels. Encouraging synergistic interactions between plants and soil, the use of cereals, herbs, legumes, chenopod and brassica ensures soil health benefits as well as leaving perennial base for future sowing. Seed to soil contact is vital when implementing sowing strategies.

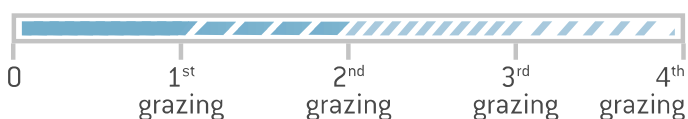

Reduces soil compaction by up to 45%
Sowing Rate (Direct Drill): **20kg/ha for undersowing**

Type: 

Rainfall:  **500 - 800**
Rainfall (mm)

PERFORMANCE INDICATOR

BENEFITS:

- Stand alone, annual crop or for undersowing
- Stimulates sub-soil microbiology
- Encourages synergistic relationships between plant and soil
- Produces high quality bulk Dry matter
- Best for conditioning your soil before you add perennial crop
